with a high level of protection.

# vft3 Helmet

Ergonomics and versatility with a high level of protection.

The **vft3 Helmet** was designed to meet the needs of units that intervene in wildland fires and rescue operations. Made with high-quality materials, it offers a high level of protection with a wrap-around design produced in a single PC/ABS part without added paint and a protective visor for more protection against liquids from aerial discharges with flame retardant.

### Greater protection and resistance

A wrap design for better protection from side, front and rear impacts manufactured with one sole PC/ABS part, without any added paint.

### More comfortable and breathable

Completely size adjustable with an adjustment wheel<sup>1</sup>. The breathable and fireproof cushioned leather pads form a totally ergonomic and comfortable harness.

### Customization

A large variety of colors available, reflective strips with marking and the possibility of adding a shield.

#### Standards

NFPA 1977-2022

Standard on Protective Clothing and Equipment for Wildland Fire Fighting
