

vft Protective Mask

Certified - Model: VFT PROTECTIVE MASK ref. AVA1307-P0000A

360° protection against radiation and particles.

vft Protective Mask

360° protection against radiation and particles.

The **vft Mask** offers complete facial protection against radiation and incandescent particles, preventing burns and reducing possible inhalation of contaminants.

The design includes high-visibility reflective strips on both sides and an all-new fixing system so it can be put on without having to take the helmet off as it features a double Velcro® system for use and rest and can be comfortably worn hanging from the neck when not being used.

Perfectly integrates with all other protective equipment

Quick adjustment without removal due to the double Velcro® system.

In use

The Velcro® close enables a perfect mask fit with the user's face. Includes elastic straps¹ for easier adjustment.

At rest

A longer and narrower Velcro® close enables a comfortable fit so firefighters can carry the mask hanging when not in use.

Mask standards

EN ISO 11612:2015

Protective clothing. Protective clothing against heat and flame. Minimum performance requirements. Protective clothing. General requirements.

EN ISO 13688:2013

Protective clothing. General requirements.

EN 15614:2007 (The PPE also complies with points 5, 6, 7, 8 and 9.1 of standard EN 15614. For protection compliant with EN 15614, it must be used along with a complete suit compliant with this standard).

Protective clothing for firefighters. Laboratory testing methods and requirements for forestry clothing.
